Data sheet:
homeplug 500 Mbps dual pack plus socket

Product code : LN-518
Product name : homeplug 500 Mpbs dual pack plus socket
EAN code : 8716502023899

Create an extremely fast network via the electrical wiring without the need to install cables and without blocking your power plug socket

By making use of the Homeplug 500 Mbps Dual-pack, consisting of two homeplug adapters, you can quickly and easily create an extremely fast network at home or in the office via the electrical wiring

Because the homeplug makes use of the electrical wiring there is no need to pull cables, and thanks to the integrated power plug socket you can still plug in other devices

The Homeplug is easy to install and makes it possible to share files and peripherals among all connected devices at speeds of up to 500 Mbps in the blink of an eye. The new 500 Mbps standard is ideal for high-speed internet and demanding media applications such as streaming HD videos and online gaming. The 500 Mbps homeplugs are fully compatible with all the 200 Mbps homeplug adapters

Thanks to the integrated security button you can create a secure connection at the push of a button. The power-saving function ensures that the homeplug automatically switches to standby when the connected device is switched off. This reduces power consumption by around 60%

Technical specifications

- Frequency band: 2~30MHz, 30~50MHz(extend), 50~68MHz(super)
- Compatibility: backwards compatible with PL64series HPAV devices
- PHY rate: 500 Mbps maximum
- Modulation: support OFDM 1024/256/64/16/8 QAM, QPSK, BPSK, ROBO modulation schemes
- Encryption method: AES 128bit encryption with key management.
- HomePlug® AV MAC: TDMA and priority-based CSMA/CA channel access schemes
- Power consumption: maximum 4.42W @ 100VAC, 5.3W @ 240VAC.

This package contains:

- Homeplug 500 Mbps dual pack plus socket
- Driver CD Rom
- User manual
- 2x UTP Cable

System requirements:

- Free network port
- (for utility), Windows 7/ Vista/XP/2000
